

ALEJANDRO RAMIREZ

Software Developer (Junior) | Python · C++ · SQL · Git · Swift
Mexico City, Mexico · Remote · aleragu1209@gmail.com · +52 55 2081 4917 · LinkedIn · GitHub · Portfolio

PROFESSIONAL SUMMARY

Junior Software Developer with a strong foundation in Python, C++, SQL, and Git. Experience working with structured data, backend fundamentals, SAP systems, and administrative tasks using Microsoft Excel. Built automations using Python and pandas for data extraction and reporting. Bilingual (English/Spanish), analytical, detail-oriented, and open to feedback.

TECHNICAL SKILLS

Excel: Pivot tables, VLOOKUP, data tracking, reporting

Programming: Python, C++, SQL, JavaScript, Swift

Concepts & Tools: Data structures, backend fundamentals, Git, SAP, pandas, web scraping, FastAPI, Tailwind CSS, debugging, clean code

Languages: Spanish (Native), English (Bilingual)

PROFESSIONAL EXPERIENCE

E-Business Specialist | Palacio de Hierro (Ferragamo) — Mexico City | 2025 – Present

- Coordinated with Ferragamo store locations and warehouse logistics to fulfill and deliver online purchases using SAP.
- Led enrichment of Ferragamo product catalog within Palacio de Hierro's platform.
- Built a Python automation to scrape product data from Ferragamo.com and used pandas to call the Ferragamo.com API, exporting structured data into Excel spreadsheets.

Software & Web Development Intern | Business Concepts S.A. de C.V. — Mexico | 2024 – 2025

- Maintained and improved a production website using structured logic.
- Refactored code to improve readability and reduce errors.
- Collaborated using Git in a team environment.

Compliance Analyst | T&A Home — Mexico | 2023 – 2024

- Ensured accuracy and validation of operational data across workflows.
- Verified documentation and detected data inconsistencies.
- Supported cross-functional teams in process-driven environments.

EDUCATION

Tecnológico de Monterrey — Bachelor's Degree in Computer Science (completed core coursework)

Relevant areas: Data Structures & Algorithms, Programming in C++, Databases and SQL, Software Development Fundamentals

CERTIFICATIONS & TRAINING

Apple Coding Academy — Swift Bootcamp

Completed Swift bootcamp; final project (Deluxe Application, most advanced tier) on GitHub: MisMangasDeluxe

Prompt Engineering for ChatGPT — DavidsonX / edX

Completed course covering prompt design, chaining, and practical ChatGPT applications.

ChatGPT Prompt Engineering for Developers — DeepLearning.AI

Completed course focused on iterative prompting, summarizing, inferring, and building chatbot applications.

Tailwind CSS From Scratch — Udemy / Brad Traversy

Completed 12.5-hour course building real projects with Tailwind CSS utility-first framework.

Technical Writing One & Two — Google

Completed Google's technical writing courses covering documentation clarity, style, and structure.

FastAPI — The Complete Course (Beginner + Advanced) — Udemy

Completed course covering RESTful APIs, full-stack applications, authentication, databases, and deployment with FastAPI and Python.

CS50's Cybersecurity — Harvard / edX

Completed Harvard's cybersecurity course covering threats, defenses, and security fundamentals.

Google Cybersecurity Certificate — Coursera

Completed industry-recognized certificate covering security operations, risk management, and threat detection.
